# SENTRY DR

# Any Disaster *15 min Recovery*

AFFORDABLE, FULLY MANAGED, ONSITE/OFFSITE  
TRUE BUSINESS CONTINUITY SOLUTION

*When your server experiences a failure – any kind of failure – can you be up and running in 15 minutes? With SENTRY DR from GO Technology Management, you can be.*

## Redefining Backup & Disaster Recovery

### WHAT IS SENTRY DR

Our Backup and Disaster Recovery Solution is a tape replacement solution that includes disk to disk block level backups, off-site data storage, server virtualization capabilities and backups as frequently as every 15 minutes. Should a disaster destroy your mission-critical business servers, we can also perform an entire restore to dissimilar hardware.

No other solution on the market offers such a comprehensive set of features. for such an affordable price.

### HOW DOES IT WORK

*To protect your data on-site - we place our SENTRY DR Appliance at your location. For each server we backup, we take a snapshot image of it every 15 min. This allows us to rapidly restore data or virtualize the server in the event of a failure.*

*To protect your data off-site - we send your data encrypted to our data centers at Baltimore and Phoenix using military grade encryption. In the event of fire, theft, flood, etc., we overnight a new SENTRY DR. When we turn it on, it looks exactly like the servers that we destroyed.*

### DID YOU KNOW

- 40% rank automated data backup and recovery as their primary IT need.
- 30% admit they have no formal data backup and storage procedures.
- 55% rate their disaster recovery solution as fair, poor or none.
- 33% wait until there is a problem before reviewing their backup and storage procedures.
- 21% do a poor job of maintaining business data offsite
- 13% admit to not removing backup files off-site at all.

# Redefining Backup & Disaster Recovery

*It's not a question of if a server will fail; it's a question of when.*

According to a study conducted by AT&T, fully one-fourth of business owners

don't bother to concern themselves with the security of their business's data. Sixty five percent agreed that backing up data in the event of a disaster is very important and 93% of those actually do so. Of that group, 47% back up daily, and 72% back up weekly. The alarming statistic is that **only 7% back up their data off-site!**

**“ The Key is to make the process automatic, convenient, and painless . ”**

GO Technology Management is a Managed Service Provider. We are experts in the field of backup and disaster recovery

and can perform this function at a lower price, than companies can do it themselves. You don't need to have the additional

expense to maintain the staff or expertise to provide this. For the small business owner, our solution provides you peace-of-mind, knowing that your data is automatically and securely maintained on and off-site.

Your servers can always be replaced, but what about your data? For small businesses, backing up servers can be a time-consuming and cumbersome process. But the cost of data loss can be huge and even fatal.

Our SENTRY DR Backup and Disaster Recovery solution can save your business hundreds or thousands of hours of productivity and man-hours that have been spent generating your most critical data.

## We offer a true business continuity solution

- IMMEDIATE RECOVERY
- RECOVERY FROM ANY DISASTER
- LIMIT COSTLY DOWNTIME
- PROTECT YOUR INVESTMENT
- GUARANTEED RELIABILITY

Model:	SENTRY DR400	SENTRY DR1000	SENTRY DR2000
Supported Servers:	1	5	10
Supported Capacity:	400GB	1TB	2TB
Form Factor:	Tower	Rack 2U	Rack 2U
RAID:	Raid 1	Raid 10	Raid 10
Hot Swap HD:	Yes	Yes	Yes
CPU:	AMD Athlon	AMD Opteron DC	AMD Opteron DC
Memory:	4GB	8GB	8GB
VM Acceleration:	No	Yes	Yes

**SIMPLE  
AFFORDABLE  
MANAGED**

- **Block Level Backup**  
We can backup locked files and folders.
- **Military Encryption**  
We use 128-bit AES encryption, the same as military.
- **Smart Transfer**  
We will never bog down your Internet connection.
- **Virtualization**  
Your server up and running in 15 min.
- **Exchange Server**  
Restore information store, mailbox or a single email.
- **SQL Server**  
Restore database, or an individual table.
- **Dissimilar Hardware**  
Perform server upgrades in minutes, not hours or days.
- **File / Folder Restore**  
Drag and drop to restore anything.

**JUST IMAGINE  
UP AND  
RUNNING IN  
ONLY  
15 MINUTES**
